

What if our patients could feel as supported by MSK wherever they are as they do when they are here in our clinics? We were inspired by the idea that we could help patients stay connected and leverage tools that an app could provide, like pop-up reminders, as well as the ability to access the app when offline.

**Mobile App features include:**

- Calendar & Appointments
- Secure Messaging
- Lab Results
- Radiology Results
- Medication List
- Reminders & Tracking
- Symptom & Vitals Diary
- Easy Sharing
