

The 64th Street Exam Room

The **Clinic of the Future** encompasses innovative design concepts and integrated technologies to create patient-centered spaces for high-quality clinical care and research.

The **Clinic of the Future** centers around 4 key elements: universal rooms designed for both examination and consultation, flexible and collaborative team workroom spaces, full integration of “smart-room,” innovative technologies, and comfortable and engaging patient and visitor spaces

Learnings from this space are actively being incorporated in the development of new standards for future outpatient centers.
