Excellence. It’s a start.

Your energy and passion can help improve lives and transform your career. Join our global team of high performers and help millions live healthier lives.

Facts and Figures About Medical Coding

- Over 22% projected increase in medical coding careers in the US by 2022
- 7,700 performance experts provide revenue cycle leadership, innovation and the operational excellence to eliminate the inefficiencies in health care and prepare for value-based reimbursement
- 7,800 staff focused on driving performance for provider revenue and services management
- 1,200+ people work in a clinical setting, scheduling and registering patients, supporting businesses
- 1,600+ people work in our large services centers in California, Arizona and New York, supporting our hospital clients with billing services for their patients
- 10+ sites across CA, AZ and NV supporting Dignity Health
- 7 sites in New York and Long Island supporting Northwell Health
- Over 22% increase

Career Paths — Growth and Development

- You’ll find strong resources and training to help keep you current on ICD-10 and subsequent code updates.
- We know that experience can come from a variety of avenues, but while level of schooling completed is flexible, we do require coding credentials from either AHIMA/AAPC (RHIA, RHIT, CCS, CCS-P, CPC, CPC-H, CPC-P).
- As a medical coder, you’ll have the opportunity to grow and develop your coding expertise.
- If you are coding for a large teaching hospital with difficult accounts, you will be responsible for 1.5 - 2 charts an hour. If you are placed in a small community hospital it should be 3 - 4 an hour.

Medical Coder Work Environments

- All Coding roles are telecommuter positions
- Computers are shipped directly to coders home location
- A dedicated workspace is required in your home where Medical Records (Containing PHI) can be coded in private
- Work schedules are selected by coders and include the comfort of working in their own home

Optum360 Locations

- Optum360 has operations across the U.S.
- Product and technology development, deployment, support and innovation
- Content — coding books and reference tools both electronic and print
- Service Centers providing support to customers (billing, customer support call centers, etc.) We also have staff in our clients hospitals.

This is the opportunity to do your life’s best work.®
