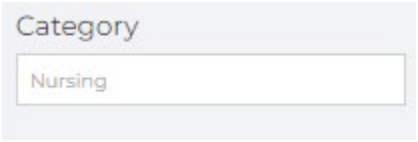
Refine your search with keywords!

Use the **KEYWORD** field to find jobs that perfectly match your skills and interests. Below are some examples on how to target specific roles and filter out irrelevant ones.

Operator	Function	Example	Results
AND	Provides results that contain both or all keywords	RN and ICU 	Anything in the job description that has RN and ICU
OR	Provides results that contain either keyword	RN or Nurse 	Anything in the job description that has RN or Nurse
Quotation marks " "	Provides results with the exact phrase	"Registered Nurse" 	Anything in the job description that has the exact phrase "Registered Nurse" any anything after that phrase
Parentheses ()	Allows you to group together keywords and control the order in which the terms will be searched	(RN OR Nurse) and ICU 	Anything in the job description that has the RN or Nurse with ICU
NOT -	NOT or the (-) will provide search results containing the first of your keywords but not the second. Make sure to put your keywords in the correct order when using NOT, as the search results provided will exclude the latter keyword.	"Registered Nurse" -cardiology 	Anything in the job description that has the exact phrase "Registered Nurse" minus cardiology

Category Filter: you can also use this filter to help narrow your results as well:



* We offer more than you see here! While these are some popular search options, don't miss out on our wide range of opportunities. Use the keyword search field to discover your ideal role.
