

## Success at CA Technologies

# Ashwin Pai

Graduate of the Associate Software Engineering Program

As a member of the ASE program, Ashwin has been able to work within the multiple different rotations the ASE offers to get a feel for and understand each.

He has been able to work with his team on building and validating software that can scale on an enterprise level, an exceptionally large challenge but one he appreciates CA for giving him.

In his short time at CA, Ashwin has already made his mark. For a CA employee hackathon, he partnered with a Principal Software Engineer to create a lean canvas concept for a particular data set of information. Their lean canvas was chosen, and they were invited to pitch their concept to Chief Technology Officer and co-founder of the X-Box, Otto Berkes.

Ashwin was ultimately placed in the Advanced Analytics business unit and works on creating Analytics Solutions that can scale on an Enterprise level.

*“The ASE program is great because it helps you get a taste for the different areas in the company. It lets you learn different things at a much faster, easier way than other companies when you are in one business unit and that is all you do. Here you can be learning about anything.”*

Current Position:

**Associate Software Engineer, Advanced Analytics**

ASE Rotations:

**Mobile App Analytics  
Application Performance Management  
Big Data Control Center  
Advanced Analytics  
Applications Delivery**

Office Location:

**Santa Clara, California**
