

Starting Your Career With Us: Corporate Risk & Broking

Willis Towers Watson offers new graduates many opportunities in a wide range of functions and areas across the four key business segments:

- Corporate Risk & Broking
- Exchange Solutions
- Investment, Risk & Reinsurance
- Human Capital & Benefits

Spotlight: Corporate Risk & Broking

Corporate Risk & Broking (CRB) provides a broad range of risk advice and insurance broking services to clients, ranging from small businesses to multinational corporations. We help our clients identify and quantify the risks facing their business, then develop strategies and solutions to manage that exposure. Acting as brokers, we design and place insurance programs for our clients, and ensure that their claims get paid in a full and timely manner. Our mission is to help make our clients more resilient in an increasingly complex and risky world, so that they can secure their existing business and develop new ones.

Property & Casualty

About Property

Few risk management exposures are more fundamental than those related to Property. Our Property practice identifies and quantifies a client's exposure to catastrophic loss, including use of some of the most advanced catastrophe modeling available. Lines of coverage include Windstorm, Flood, Earthquake, Terrorism and Supply Chain Disruption, to name a few.

About Casualty

Casualty describes several complex areas of risk, from Automobile and General Liability to Product Liability and Workers' Compensation. Although often treated separately, we believe that these exposures are best approached with a pragmatic, cohesive strategy. The Willis Towers Watson Casualty Practice has the insight, experience and resources to accomplish this difficult and crucial goal.

Financial

Financial Lines covers a wide range of specialist areas in the financial services industry. Growing investor expectations have placed greater demands on financial institutions, leading to stricter governance and regulations. Core Financial Lines insurance products include Directors & Officers Liability, Fiduciary Liability, Professional Liability, Employment Practice Liability, and Cyber.

Transportation

Our Transportation Lines include aviation, marine, road and rail. It is a vibrant industry and an economic catalyst. With the expertise to manage complex challenges, and the profile to negotiate competitive quotes, we help clients build resilience against risk and achieve, through detailed analytics, their long-term risk management needs.

Affinity

The Willis Towers Watson Affinity Practice provides insurance services and solutions to targeted audiences such as trade associations, nonprofit organizations, professional groups, clubs and educational organizations. An Affinity program is one in which insurance products, or services are sold through an intermediary sponsor – our client partner – to their end customers.

Although insurance is not the core business of our client partners, we enable them through our model and distribution systems to implement Affinity programs that can improve their profitability, differentiate their offer, and increase consumer loyalty and retention. Consumers and small and medium enterprises (SMEs) like our Affinity programs because it is an easy way to buy insurance when the offer is relevant to their core proposition, made in a convenient moment, and through a brand they already trust.

Facultative

As insurance brokers, we count insurance carriers among our clients. For these firms, obtaining secure, consistent facultative coverage for their clients quickly and efficiently is often a challenge. Organizations with varied and unusual exposures face additional hurdles. Our Facultative practice assists insurance carriers with reducing their catastrophic exposures in the large and complex Property, Casualty and Financial Lines space.

Through the use of advanced analytics and access to global reinsurance markets on behalf of our insurance and reinsurance clients, Willis Towers Watson Facultative offers an effective and efficient solution for placing this specialized coverage.

We offer a range of graduate job opportunities across each of these segments. [View specific job descriptions.](#)
