

Starting Your Career With Us: Investment, Risk and Reinsurance

Willis Towers Watson offers new graduates many opportunities in a wide range of functions and areas across the four key business segments:

- Corporate Risk & Broking
- Exchange Solutions
- Investment, Risk & Reinsurance
- Human Capital & Benefits

Spotlight: Investment, Risk & Reinsurance

Our Investment, Risk & Reinsurance (IRR) team offers a comprehensive suite of solutions to help clients manage and measure risk and capital, through investment advice, advanced analytics, structuring and completing transactions, issuing securities and placing risk. Working in close concert with investors, reinsurers, and insurers, we apply advanced analytics with our deep institutional knowledge to help clients free up capital by managing the equation between risk and return.

Investment

A career with Investment at Willis Towers Watson will provide you with the opportunity to work with some of the largest investing institutions and investment managers in the world. You will help us change investment for the better through providing client advice and solutions around organization, risk management, asset allocation,

manager selection, implementation, and ongoing monitoring.

The world has seen tremendous shifts over recent years, and investment is no exception. Graduates play an important role in helping us adapt to this world. You will work in one or more of the following teams:

- Defined Benefit
- Defined Contribution
- Delegated Investment Services
- Structured Products

Insurance Consulting (Risk Consulting and Software)

Willis Towers Watson's insurance consultants provide cutting-edge advice and solutions to more than three-quarters of the world's leading insurance companies. Our client base comprises both global and national insurers, reinsurers and London Market insurers, including Lloyd's of London syndicates. Together our clients offer the full spectrum of insurance products, from the provision of financial aid to families following death, retirement or ill health, through motor and household insurance to more specialized contracts such as space travel, and the construction of famous landmarks.

As a recognized leader in the global insurance industry, Willis Towers Watson insurance consultants play an important role in the generation of new ideas and

techniques that are used by our clients and colleagues across the globe, many of which have become standard market practice. A key part of this is our industry-leading software, which we develop with our internal software team. We also provide market-leading insight such as the quarterly production of a competitiveness index with Confused.com, which is widely quoted across the industry.

In Insurance Consulting, we advise and provide solutions to insurance companies on the assessment and management of risk.

- The Life Insurance Consulting team works with some of the largest global life insurance organizations. Our clients offer a range of insurance products to individuals and their families which provide financial protection in a wide range of circumstances – death, retirement, ill health etc. – and offer potentially tax-efficient saving alternatives.
- The Property and Casualty Insurance Consulting team performs reserve studies, pricing analyses and capital management activities for our insurance company and self-insured clients.

Reinsurance

Willis Re is a world leading reinsurance advisor. Over our 180-year history, Willis Re has developed a deep insight into all aspects of risk, and all the ways it affects capital and an organization's financial performance. As part of Willis Re, you will become part of a stable, well-trained team that offers comprehensive service to help our clients reach and exceed their specific targets in the most cost-effective fashion.

Insurance is a fundamental necessity to the health of our economy, and reinsurance is the mechanism used by many insurance companies to endure catastrophic

events. We use sophisticated analytical techniques and processes, including proprietary and third-party modeling tools, to counsel our clients in assessing and managing their exposure to risk. In conjunction with this process, we design and facilitate customized syndications into the global reinsurance marketplace, handling billions of dollars on behalf of our clients each year. We are an international enterprise, employing in excess of 1,500 colleagues worldwide.

Software solutions

Willis Towers Watson is a preeminent developer of risk and financial modelling software, with over 400 clients across the globe.

We combine the technical innovation and engineering expertise of our software professionals with the actuarial knowledge and thought leadership of our insurance consulting business to provide solutions that help clients measure value, manage risk and safeguard solvency.

Willis Towers Watson's software supports insurance companies and other businesses that require sophisticated and auditable modelling and analytics processes as they confront volatile markets and regulatory changes. Our software solutions underpin a variety of activities, ranging from asset-liability modelling, pricing and reserving, through to economic capital aggregation and allocation.

We offer a range of graduate job opportunities across each of these segments. [View specific job descriptions.](#)
